

## TLC LIVE Education, Health, and Care Plan (EHCP) Policy

### 1. Introduction

At TLC LIVE, we are committed to providing high-quality and personalised education to all our students. Our Education, Health, and Care Plan (EHCP) policy outlines our approach to working collaboratively with other parties, adapting lesson delivery and planning to support the students individuals needs as well as providing Local Authorities with any data and evidence that may be useful for any review meetings.

### 2. Tailoring Lessons to Individual Needs

**Individual Assessment:** Before commencing any educational program, we conduct a comprehensive assessment of each student's learning needs, strengths, and challenges. This assessment involves evaluating current age based level as well as skill gaps to be able to start lesson delivery in a positive and constructive way. We continuously monitor the progress of students and regularly adjust their learning plans to ensure they remain on track and effectively address their evolving needs.

### 3. Support for Councils and Review Meetings

**a. Data Collection and Reporting:** We collaborate closely with local councils to provide the necessary data and evidence required for EHCP reviews. This includes academic progress reports, teacher assessments, and any other relevant information that contributes to a comprehensive review of a student's educational journey.

**b. Attend Review Meetings:** We actively participate in EHCP review meetings when requested by the council. A staff member will be present to provide insights, reports, and feedback to support the decision-making process.

**c. Collaboration with External Professionals:** We recognise the value of input from external professionals involved in a student's care and education. When applicable, we can collaborate with therapists, counsellors, and medical professionals to ensure a holistic and coordinated approach to the student's development.

### 4. Ensuring Student Success

Our teachers are experienced in providing effective instruction that caters to diverse learning needs.

For students requiring extra assistance, we can offer supplementary support services such as mentoring, study skills workshops, careers guidance and revision techniques to fully prepare students for their studies.

We value the active involvement of parents or guardians in their child's education. Regular communication channels and progress reports ensure parents stay informed about their child's progress and collaborate with us to optimise their learning experience.

## 5. Review and Continuous Improvement

This EHCP policy will be periodically reviewed to ensure its effectiveness and compliance with any changes in educational standards or legislation. Feedback from students, parents, councils, and staff will be sought and considered for continuous improvement.

At TLC LIVE, our EHCP policy reflects our commitment to providing a personalised and supportive learning environment for all students. We believe that tailoring lessons to individual needs, collaborating with councils, and ensuring students' success are fundamental principles that contribute to the achievement of positive educational outcomes for every student in our care.
